BIO BALL CHROME URINAL SANITIZER

Model Number: UR-BB-0020

So powerful that it's kept in a cage!

Bio Ball is the highly efficient, cost effective and environmentally credible urinal block system that ensures urinals are clean, drains remain clearer and odour free. Bio Ball's highly effective enzyme block is encased by a bio-degradable polymer cage. Bio Ball can either be free standing or elevated over the flushing waterline with the attachment of an integrated pedestal 'lollipop'. Bio Ball will not dye the urinal or end up being sludgy mess at the bottom of the drains after a few weeks.

The Benefits:

- Bio Ball is 100% environmentally friendly
- Bio Ball's 40g enzyme block contains 80 billion friendly bacteria making it 20 times stronger than current available solution
- Bio Ball disperses uric salt and reduces lime scale
- Bio Ball's strong anaerobic reaction within the urinal system gradually clears all forms of nasty substances that cause blockages
- Bio Ball reduces cost of ongoing drain maintenance and servicing
- Bio Ball reduces the amount of water needed for flushing by 90%
- Bio Ball has an average life span of 3 weeks

Features & Specifications:

- It is at least 20x stronger than other competing premium solutions.
- Fits ALL urinals without installation costs.
- Reduces required flushing water by 90-95%.
- Has an effective spearmint fragrance to ensure a pleasant washroom odour.
- The caged block is 100% soluble, leaving no residue or markings in the urinal.
- Also available in chrome and gold.
