URECO ES50 INTELLIGENT URINAL FLUSH CONTROL

Model Number: UR-FC-0010

URECO ES50 Intelligent Urinal Flush Control Unit

The ES50 urinal control unit has been extensively developed both in its software and physical design.

The same people who created the best selling unit in the UK developed the highly advanced ES50 with more features, making operation and ownership easier. These benefits include a new sleek design, factory preset functions to save set-up time, water audit feature, integrated power and valve failure alarms and either battery or mains operation.

This product has also been designed to operate in extreme environmental conditions and includes many anti-tamper features within its robust design.

Features & Specifications:

- Flow control unit with optimized flush cycle for URECO or BIO BALL.
- Saves water and money.
- Protects the environment.
- Water audit feature.
- Battery or mains operated.
- Integrated valve and power failure alarms.
- Easy setup and installation.
